Moving Your Fleet Forward with Electric Vehicles (EVs)

Massachusetts Fleet Advisory Services Program

With You for the Long Haul, at No Cost

You have a lot to juggle when it comes to managing publicly owned vehicles. Join our program to get **comprehensive, objective guidance** from experts in EVs.

- Receive a fully **customized report** about your current fleet that helps you:
 - ▶ Analyze your organization's conditions and unique needs
 - ▶ Easily understand data about how EVs will impact your fleet
 - ▶ Pitch solutions to key decision makers on your team
- Plus, you'll get:
 - ▶ Access to a web portal with lifetime savings estimates for your fleet
 - ▶ Support through regular, one-on-one check-ins
 - ▶ Help finding **financial assistance** to help offset the cost of switching to EVs

Eligible Fleets

Publicly owned fleets in Massachusetts are eligible for this free program. That includes:

Municipal

School bus

Transit

State and federal
government

Medium-duty

Benefits of Using EVs

Fueling Cost

Compared to gasoline and diesel vehicles, EVs are up to 3x more efficient.

Cost of Ownership

Annual operations and maintenance costs are 20–60% lower for EVs than for conventional vehicles, and financial assistance can help offset upfront costs.

Emissions

EVs don't produce any tailpipe emissions or noise pollution, which means cleaner air and quieter streets in your community.

Environment

Using an EV instead of a conventional vehicle has the environmental impact of growing about 8 trees—or avoiding 4.6 metric tons of carbon dioxide—each year.

See the Savings

Looking for a quick way to tell if electrifying your fleet is worth the effort? Our Instant Estimate tool can help.

After you enter basic information about your fleet, you'll be able to compare an all-electric vehicle, plug-in hybrid electric vehicle, and conventional gasoline or diesel vehicle in terms of fuel costs, emissions, and more.
